产品介绍 Product Introduction

消火栓是城市的重要公共消防设施，当发生火情时可及时提供消防水源，确保生命及财产的安全。室外地上式消火栓是城市消防系统的重要组成部分，即可直接连接消防水带进行灭火作业，又可供消防车或者消防泵取水扑救火灾。

北消公司生产的室外地上式消火栓分防撞型消火栓和普通型消火栓两种，均通过国家消防产品型式认可。

公称尺寸：DN100~DN150

The fire hydrant is an important public fire-fighting facility in the city. When a fire occurs, it can provide fire-fighting water in time to ensure the safety of life and property. Outdoor above-ground fire hydrants are an important part of the urban fire protection system, which can be directly connected to fire hoses for fire fighting operations, and can be used by fire trucks or fire pumps to fetch water to fight fires.

The outdoor above-ground fire hydrants produced by Beixiao Company are divided into anti-collision fire hydrants and ordinary fire hydrants, and both have passed the national fire protection product type approval.

Nominal size: DN100~DN150
