

# 泡沫消火栓箱 Foam fire hydrant box

应急管理部消防产品合格评定  
China Certification for Fire Products of MEM

## 产品介绍 Product Introduction

泡沫消火栓箱是新型、高效低倍数泡沫固定灭火装置。当压力水经过比例混合器时，可使水与泡沫液按规定比例混合，经发泡枪产生泡沫扑救有机固体物类、可溶化的固体类火灾，尤其对扑灭木材、棉花和油类火灾更有特殊效能。

泡沫消火栓箱主要由箱体、泡沫液贮罐、比例混合器、泡沫枪、软管卷盘（消防水带）、供泡沫液阀门、管道及报警组成。

Foam fire hydrant boxes are new, high-efficiency low-altitude foam fixing fire extinguishing devices. When the pressure water passes the proportional mixer, the water and the foam can be mixed according to the specified ratio, and the foam is generated by the foaming gun to save the organic solid matter, the solubilized solid fire, especially for the fire, cotton and oil fire There is a special effect.

The foam fire hydrant box is mainly composed of a box, a foam tank, a proportional mixer, a foam gun, a hose reel (fire water belt), and the bubble valve, pipe and alarm composition.

## 应用范围 Application range

地下停车库、飞机维修库、化学危险品仓库、固体物质仓库、易燃液体仓库、化工厂、炼油厂、油罐区、加油站、机舱、泵舱、货舱等。

Underground parking garage, aircraft maintenance library, chemical harsis warehouse, solid material warehouse, flammable liquid warehouse, chemical plant, refinery, tank area, gas station, cabin, pump cabin, cargo cabin, etc.
